

SUSTAINABLE SUGARCANE BAGASSE PRODUCTS

Ambica Eco Axiom

Manufacturer of eco-friendly, biodegradable and compostable food packaging solutions.

ABOUT US

Ambica Eco Axiom is a manufacturer of eco-friendly, biodegradable and compostable food packaging solutions. Every plate, bowl, clamshell and tray we make starts as sugarcane bagasse — the fibrous residue left behind after juice extraction — pressed and moulded into tableware that is strong enough for real kitchens and gentle enough for the planet.

We work with restaurants, catering businesses, cloud kitchens and food delivery services who want a genuine plastic-free alternative without compromising on strength, heat resistance or presentation.

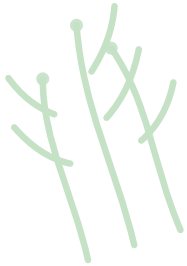

MISSION

Our mission is to make sustainable, compostable tableware the obvious choice for businesses across India and beyond — by keeping quality consistent, pricing sensible at real order volumes, and documentation ready for the markets our customers serve.

VISION

We envision a future where single-use plastic and foil packaging is no longer the default — where every bowl, plate and box that leaves a kitchen returns safely to the earth. Bagasse is our starting material; a genuinely circular economy is the goal we're building toward, one order at a time.

**100% COMPOSTABLE AND
BIODEGRADABLE TABLEWARE**

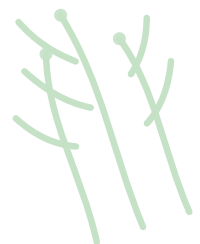

CATEGORY 01
